

Bootstrap Report

- What does this technology (library/framework/service) accomplish for you?
 - Bootstrap is a free open source framework that is used for HTML/CSS/JS in front end development.
 - It contains CSS based templates and components such as navbars, cards, modals
 - It makes creating front end easier through predefined CSS styling given to certain classes that direct to components.
- How does this technology accomplish what it does?
 - Bootstrap uses CSS and sometimes JS to style classes in terms of components. The CSS target classes that give styling such as color, padding, margin, fonts, backgrounds, borders, radius, lists, shadowing, image formatting, etc.
 - Currently, in our front end, we are using cards, navbars, inputs, buttons, drop-down menus, list groups, card-decks, Containers, pagination.
 - Cards
